

Online Port Course

PERISHABLE LOGISTICS

07/06 -02/07

Port of
Antwerp

A smart port connecting smart people

WHY

At Port of Antwerp, we actively contribute to time-efficient cold chains. Port of Antwerp is renowned for its well-functioning in- and outbound flows, due to the accessibility of its existing network.

This online course on Perishable Logistics zooms in on different aspects of perishable cargo handling. The course features recent trends in cargo flows, innovative equipment, the uninterrupted cold chain whilst applying multimodality, and the newest regulatory frameworks. Our goal with this course is to show you how to optimize your perishable supply chain to increase efficiency and competitiveness.

FOR WHOM

This course is targeted towards middle and senior management directly or indirectly involved in perishable logistics and supply chain management.

WHAT

The course contains 4 modules

1 The Perishable Market

A detailed, global market outlook on the perishable trade and strategies to position perishable goods in the European market

2 Innovation in equipment

Trends in reefer container equipment, a deep-dive into conventional shipping and remote monitoring devices & platforms

3 Developing an efficient cold chain

How to create an uninterrupted cold chain from terminal efficiency to cold stores and hinterland transport, including a unique view on the use of the sea-air interface for pharmaceutical goods

4 Regulation & Insurance

Deep-dive into regulatory frameworks for import and export of perishable goods, as well as case studies explaining the importance of insurance and risk mitigation
