

A SMART PORT  
CONNECTING SMART PEOPLE

APEC organises port training courses since 1977, transferring knowledge from one port professional to another. More than 19.000 port professionals from all over the world joined in one of the courses over the past forty-five years. APEC has an array of knowledge and skills, presented by Port of Antwerp-Bruges, the private and public maritime sector in Flanders.

Our extensive range of courses facilitates direct interaction with industry experts in the maritime and logistics sectors of Port of Antwerp-Bruges, as well as throughout the Flemish region of Belgium. These courses not only impart knowledge but also serve as a dynamic platform for participants to expand their professional networks and establish enduring connections with fellow participants.

APEC gathers port professionals from around the globe and shares best practices empowering each and every participant in further developing their personal career.

Leveraging the digital platform, APEC provides port professionals with an extensive range of learning journeys, offering them a vibrant selection of options to engage with APEC's training opportunities.
