WHAT

Welcome to our sustainability training course for harbor professionals!

This course is specifically designed to provide you with the tools and knowledge you need to make your harbor operations more sustainable.

As our planet faces unprecedented environmental challenges, it's crucial that the maritime industry plays its part in promoting sustainable practices.

This course will help you understand the impact of harbor operations on the environment and how to reduce that impact through sustainable practices.

Our expert instructors will guide you through a comprehensive curriculum that covers a range of topics, including energy efficiency, waste reduction, and pollution prevention, You'll learn practical strategies and techniques that you can apply immediately to make a positive impact on your harbor's sustainability.

Not only will you gain valuable knowledge, but you'll also earn a certification upon completion of the course, which will demonstrate your commitment to sustainability to your colleagues and stakeholders.

Join us in this important journey towards sustainability. Together, we can make a difference and ensure a better future for our planet. Register now for our sustainability training course for harbor professionals.

CERTIFICATE

Upon completion of the course, an IAPH, Havenbeheer Suriname and Port of Antwerp-Bruges International certificate will be granted to the participants.

The certificate will:

- Help validate your skills and knowledge and demonstrate your expertise towards potential employers and clients;
- Provide you with a competitive advantage, as it enables you to differentiate yourself;
- Help to improve your credibility towards clients, customers and potential employers; it shows that you have taken the time and effort to gain a certain level of knowledge and are committed to staying up-to-date on the latest trends and practices in your field.

This certificate will prove to be a valuable investment in your personal and professional development.
